College of Engineering, Design and Computing
[Computer Science and Engineering Department Website](#)

Program Overview:

The Computer Science B.A. degree is designed with a modular approach and 35 free elective credits that allows students to customize their program by combining a strong grounding in computer science with an area of concentration aligned in other academic disciplines aligned with their interest. Students are encouraged to use their free electives to pursue minors and dual majors in other academic disciplines. The program's computer science curriculum includes courses in topics such as algorithm development, programming language concepts, hardware software interfaces, database systems and the structure of computers. Later portions of the program focus on computer architecture, the interrelationship of hardware and software, embedded systems, computer networks and software design. The Computer Science B.A. degree prepares students for fast paced and high demand careers in computer science and career fields that rely on computing.
