CAPSTONE DESIGN
CREATE WITH US.

IMPACT AND INNOVATION THROUGH INDUSTRY-SPONSORED PROJECTS

Capstone Design can create a new, innovative product, process or service for your organization. Student design teams consist of between 3-5 students (often interdisciplinary). Student design teams learn and implement a state-of-the art Design Innovation (DI) process. Capstone projects use an "Agile - Sprint" cadence. Projects have extensive engineering analysis and/or simulation + prototypes to demonstrate feasibility. **Please contact lary.speakman@ucdenver.edu to get involved today!**

The IP generated as part of the project belongs to the sponsor. Sponsoring a capstone project costs up to $15,000 per project, depending on the scope.

This cost covers ownership of the IP and materials cost for a team of 3-5 students.

Projects are documented with very high-quality visual communication products. Sponsors obtain a "feasibility demonstration level" prototype with documentation at the end of the project.

1 and 2 semester project formats are available. Final projects with prototypes are delivered and then displayed at a college-wide Capstone Design Expo.
